## Call Us About Upgrading To A Cellular Communicator With Total Connect

Are you cancelling your telephone lines or going with VOIP? Then you need to upgrade to a cellular communicator. Without a telephone line, your alarm system cannot transmit alarm signals to the central monitoring station. If you have VOIP, there is a good possibility that signals will not always transmit properly, if at all. An AlarmNet cellular communicator remedies this problem.

AlarmNet also gives you access to the Total Connect feature. With Total Connect, you can monitor your alarm system from anywhere with an internet connection. Anything you can do from your keypad, you can do remotely, over the internet, with your smart phone. For those with multiple accounts, you can access up to 100 locations with one login. This is great for people with vacation homes, school districts, and franchises.

Total connect allows you to keep an eye on your kids, babysitters, pets, and employees. View up to six cameras at a time, including low-light models for added security in dark indoor environments. Get email notifications, text and video alerts in real time. Know exactly when your child gets home from school, when an employee enters a restricted area, or when the house cleaner arrives.

Total Connect acts as a remote control for your home. You can lock and unlock doors, turn lights on and off, and control your thermostat, allowing you to adjust the heat or air conditioning when you are away.

Look into this low cost option today. We would be happy to provide you with an estimate (530) 243-2521.
