Vacation Checklist

Summer is back! If you have vacation plans, we have compiled a checklist of important things to do before you leave that will help keep your home safe and sound while you're away.

- Tell a trusted neighbor that you will be away. They can keep an eye out for any suspicious activity.
- Notify California Safety that you will be out of town. Be sure we have contact information of someone who can respond to any alarms, low batteries, etc.
- Stop your newspaper and mail delivery.
- Set your landline to forward calls to your cell phone.
- Put everything in your yard away. Walk through your front and back yards and quickly scan to make sure things like lawnmowers, bikes and other valuables are put away and locked up. Make sure ladders and other objects that can be used to gain entry into your home are locked away.
- Lock your back gate and any exterior buildings like sheds or storage rooms.
- Close and lock all your windows, including upstairs and basement.
- Turn off and unplug unused appliances.
- Lock all the doors.
- Arm your security system.

3 Good Reasons to Upgrade to a Total Connect Compatible System

1. Remote Security

- Remotely arm, disarm or check the status of your security system.
- Access up to 100 locations with one login.
- Multiple account capability is great for vacation homes or franchises.

2. Video Solutions

- 24/7 live, look-in video of your home or business.
- Great way to keep an eye on your kids, babysitters, pets and employees.
- Set up schedules to receive email notifications based on time and day.
- View up to six cameras at a time, including low-light models for added security in dark indoor environments.

3. Real-Time Alerts

Get Email Notifications, texts and video alerts in real time. Know exactly when your child gets home from school, an employee enters a restricted area, or when a pet sitter arrives.
